

- Before you start you will need:
  - Copy of game sheet.
  - Username and password (restricted to coach and their designate).
- From the Statistics Tools select the “Report 2007-2008 – Regular Season Game Score’ menu item

This will take you to a listing of games. If you do not see the game that you are looking for change the range of dates to look for, the default is for the current date only. You need to expand this range by setting the start date to a date prior to when the game was played. Use the drop down menus to select the date and then press the “View By Date Range” button, which will cause the web page to update with the games for your team in the range specified.

The GoalLine game number will not match the LCHML game number, so it is important to select the game based on date, time, home team, and visitor team.

Once you have found the game you have three options:

- report the game - enter the game results
- print game sheet – print a copy of the GoalLine game sheet – not to be used!
- reset – if you have made a error in entering the results press this and start over.

- NOTE:**
- ***The home and visitor teams can enter and change the results of the game at any time the results will not be locked.***
  - ***The Division Statistician will be verifying and monitoring the results against the***

Please report errors, omissions or suggestions for additional topics to <mailto:LCWeb@lcmhl.ca>

***faxed in game sheet.***

- ***If you notice any errors please advise your Statistician.***

➔ Select the 'Report The Game' option.

You will be presented a summary of the game that you can use to verify that you have selected the correct game.

Select the desired game and indicate which players were dressed for the game. This is done by clicking on the box in front of the player's name.

			16	<input checked="" type="checkbox"/>	UNKNOWN, Unknown
<div style="background-color: yellow; padding: 2px 10px; display: inline-block; font-weight: bold;">submit line-ups</div>					

If you only see player number "0" then the team has chosen not to enter the player's numbers and names. So respect their choice by selecting only this player and recording all scores and penalties against this player in the subsequent steps.

If you see only a list of player numbers with names (generic or specific) the team has chosen to track the detail stats but not display the player names. Select the player's based on their jersey numbers.

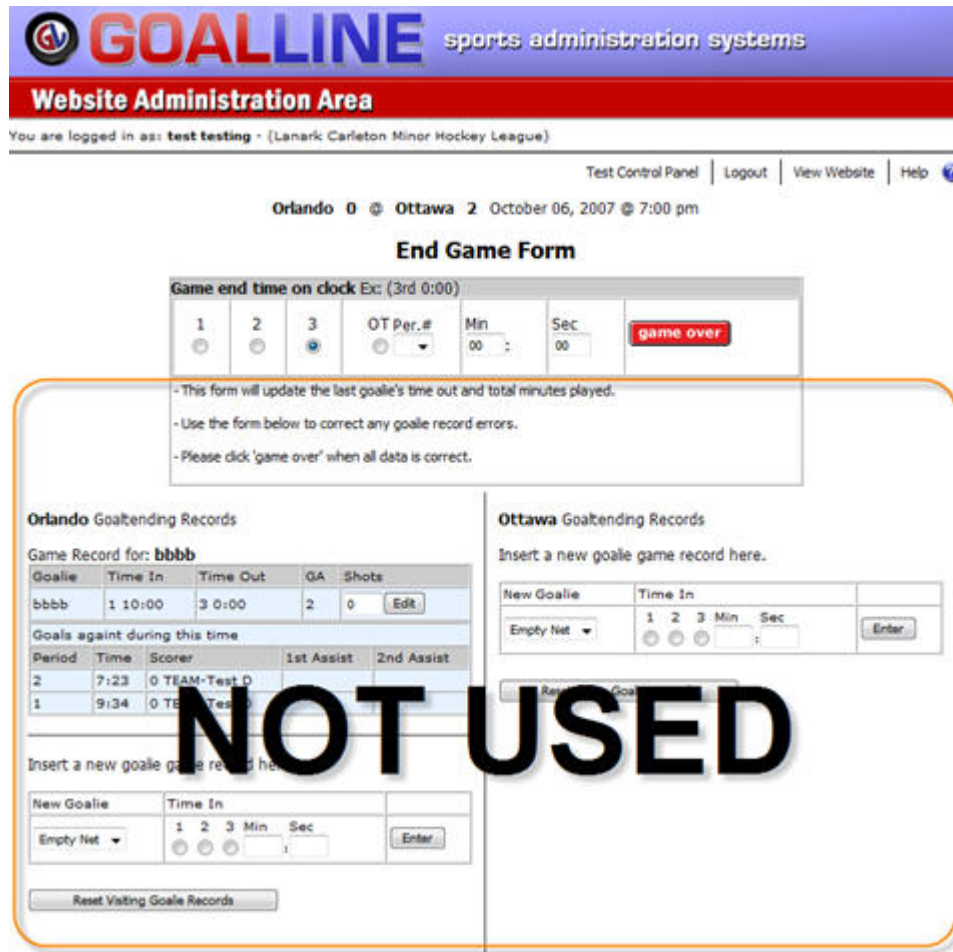

Should a player number appear on the game sheet that is not on the list you will need to add them to the list using the "Add Player to Roster" At the present time this is not functional, so enter any scores or penalties for the players not on the roster to the player number "0".

➔ Press the "SUBMIT LINE-UPS".

You will now see a game sheet with the VISITOR on the left and the HOME on the RIGHT.

→ Press the “GAME OVER” button.

You will now receive a message indicating that the game has been successfully recorded. If not please let your Statistician know what the error message was.

**The game has been recorded and all statistics have been updated**

→ The game results have been submitted.
